

WILD ADORNMENT

by nature

Wild Adornment is nature transformed into wearable art,
each piece of jewellery is inspired by African flora and fauna.

The collection echoes the spirit of the African bush and the Cape floral kingdom,
telling the story of its wild origin.

I am an artist and traditional African healer whose calling for the African bush
and its medicinal and spiritual wonders has inspired my creations.

I have been gathering elemental objects from across Africa, casting them into metal,
thereby transforming their primal beauty into wild adornments.

Each crafted design is deeply rooted in my knowledge of the natural world and its symbolism,
all ethically sourced from nature.

Protea Ring Collection

PROTEA COLLECTION

The Protea family is named after the Greek god, Proteus, who is known for his shape-shifting abilities and versatility

Like Proteus, Protea plants demonstrate remarkable diversity and adaptability.

Their spiral-shaped pods house many seeds - radiating growth and unlimited potential.
